

MIRJA RIYADH

BIM SPECIALIST (REVIT)

Phone: +8801717144566
mirja.riyadh@gmail.com
Dhaka, Bangladesh.

PROFESSIONAL SUMMARY

Dedicated and highly skilled Revit Modeler with a proven track record of creating detailed and accurate Building Information Models (BIM) for architectural, structural, and MEP engineering projects. Adept at collaborating with multidisciplinary teams to produce high-quality designs that meet project specifications. Seeking opportunities to contribute expertise and advance a career in architectural, structural, and MEP engineering design.

CORE SKILLS & SOFTWARE

Autodesk Revit • Autodesk AutoCAD • Autodesk Navisworks Manage • MS Excel • MS PowerPoint • Adobe Photoshop • Adobe Acrobat DC

SERVICES OFFERED

- Conceptual, Construction/Shop & GA drawing
- Architectural 3D Model
- MEP 3D BIM Model (HVAC, Plumbing and Electrical)
- Point Cloud to 3D Revit BIM Model
- PDF, Sketch, Image to 3D Revit BIM Model
- Custom Revit Family with formula as per client's requirements
- 2D & 3D drawing for all services

AREAS OF EXPERTISE

- Precise architectural 3D modeling using Revit
- Structural detail 3D modeling of Footing, Column, Beam, Beam System, Floor, Roof, etc.
- HVAC auto and manual ducting, sizing, Room Data, and material take-offs
- Modeling connected piping systems: cold/hot domestic water, chilled/hot water, chiller systems, plumbing, pipe sizing, FU, flow, etc.
- Electrical connected systems: switches, sockets, data points, cable trays, and electrical load data
- Point Cloud to BIM Revit modeling
- Developing Revit families with formula-driven parameters
- Data research, collection, and analysis
- Data handling with Excel logical formulas, formatting, and lookup tables
- Clash and conflict identification using Navisworks (Profiler appearance, Search Sets, Asset identification, TimeLiner)

KEY ABILITIES

- Expertise in creating accurate Revit models with detailed systems
- Creating quality construction documents, BIM coordination, and collaboration
- Excellent communication skills to work effectively with cross-functional teams
- Adherence to company guidelines and codes for drawing and documentation
- Ability to take on challenges and make instant decisions during modeling to achieve clash-free, sustainable design
- Ability to manage multiple projects simultaneously
